

# COVID-19 and Monkeypox Pre-Screening Questions

Your health and safety are our top priority.

We are closely monitoring ongoing COVID-19 and Monkeypox developments.

**Before your next appointment, please review these pre-screening questions and the additional helpful information:**

## PRE-APPOINTMENT SCREENING QUESTIONS

**If your answer is "yes" to any of these questions, please contact us as soon as possible so that we can discuss next steps in your infusion care.**

- Have you, or anyone in your household, been diagnosed with COVID-19 or Monkeypox within the last 14 days?
- Have you, or anyone in your household, had contact with someone with suspected or confirmed COVID-19 or Monkeypox within the last 21 days?
- Are you experiencing any of the following: cough, shortness of breath, a fever over 100° F, sore throat, new loss of taste or smell, headache, muscle pain, flu-like symptoms, or rash?

## WHAT IS EVENTUS INFUSION DOING IN RESPONSE TO COVID-19 AND MONKEYPOX?

- We continue to monitor COVID-19 and Monkeypox developments. To optimize coordination, communications and preparedness, we have formed an Outbreak Preparedness Task Force. This task force is focusing on preparedness plans.
- Our employees are required to follow stringent infection control policies.
- We follow CDC guidance when assessing patients/clients with a fever, lower respiratory symptoms such as coughing or shortness of breath, rashes, and other symptoms.
- All COVID-positive employees are required to quarantine for five days and not return to work until they are fully recovered, and have not exhibited any symptoms for a full 48 hours after the quarantine period.

**We appreciate your trust in our team to partner with you through your therapy.**

**Please contact your local Amerita branch if you have any additional questions or concerns.**
